

Students' experiences taking a first-year mathematics course

A Dialogue on CS and Math Education
High School CS/Math Teacher Workshop 2018

Thursday, June 7th

What was your biggest shock/surprise
in a first-year mathematics course?

In which ways did your high school experience prepare you well or adequately for a first-year mathematics course?

What concepts were key in a first-year mathematics course that were not emphasized enough in high school?

If you could tell three things to your
high school mathematics teachers,
what would those be?

What advise do you have for your
younger peers who are about to take a
first-year mathematics course at a
university?
