Students' experiences taking a first-year CS course

A Dialogue on CS and Math Education
High School CS/Math Teacher Workshop 2018

Thursday, June 7th

What was your biggest shock/surprise
in a first-year CS course?

In which ways did your high school experience prepare you well or adequately for a first-year

CS course?

What concepts were key in a first-year CS course that were not emphasized enough in high school?

If you could tell three things to your high school CS teachers,

what would those be?

What advise do you have for your younger peers who are about to take a first-year CS course at a university?
